

Guidelines to be followed when approaching scrutineering in 2015.

What to bring: Your racebike, your racing outfit and your signed and approved Nordic machinecard. No card = no racing!

The card signed by you verifies that your bike follows and fulfill all present rules and regulations for the class in question.

To speed up the process of scrutineering wear your outfit and notify race stuarths/ scrutineers, if any alterations have been made to the bike since last inspection/ card verification.

Scrutineer should check racebike for:

Security items like: secured oil- lines, brake anchor points, wired chain-masterlink,and downward facing oil- drains, movement of steering, suspension and bushings, bearings etc.

But only after verifying that machinecard is present and racebike meet all regulations of its class - when in doubt he will get assistance from current class- representative. Together they will decide procedure for rectifying problems and issuing a new card. Scrutineering will continue once payment for new card has been made!
